

1. संप्रदानम् - *Tuning in with the science..*

Do you want to feel the ease in chanting and memorising the *shlokas*? Do you want to connect with the *brihatrayees* as if you are talking to your friend..? Your dream is possible!

Have you ever observed a mother bird feeding its chicks? It brings a large prey to the nest, breaks it down into pieces and feeds the chicks little by little, because mother knows the capacity of the chicks. This technique gives opportunity to the chicks to swallow and digest the small chunks and eventually to grow as an independent bird which can soar up in the sky, and hunt its own food.

Likewise, we too can get the same kind of initial support in studying the *shastra*, from the technique called ‘*Sampradaanam*’, to become self-reliant *Vaidyas*, who can efficiently decode the *shastra* and apply them in the Practice.

What is ‘संप्रदानम्’?

" सम्यक् प्रविभज्य दानम् " – संप्रदानम्

‘सम्यक् प्रविभज्य’ means ‘to divide/split properly’; ‘दानम्’ means ‘to give’/ ‘to offer’.

‘*Sampradanam*’ is a skillful way of offering/giving something by dividing/classifying thoughtfully according to the ability of the receiver.

This is one of the skills that every *vaidya* should develop and this is mentioned in *Sushruta samhita sutrasthana* 3rd chapter, which is named as अध्यायनसम्प्रदानीयम्. This chapter reveals the secrets about how to study our *shastra*.

The classification of the entire *Sushruta samhita* into different *Sthanas and Adhyayas* is mentioned in this chapter. This classification itself is an example for संप्रदानम् or proper classification into smaller units so that it becomes easier to understand. At the end, *Sushruta* explains how exactly to read the संहिता using the technique of संप्रदानम्.

How exactly सम्प्रदानम् works.?

As we all know, संहिता has two kinds of sutras - a) पद्यसूत्र, b) गद्यसूत्र. पद्यसूत्र is also called as श्लोक. श्लोकs are coded according to different छन्दस् (i.e a set of rules which make the सूत्र rhythmic is called as छन्दस्) and each छन्दस् has its own structure. In अष्टाङ्ग हृदय, most of the shlokas are in अनुष्टुप् छन्दस्.

अनुष्टुप् छन्दस् is a type in which there are 32 letters in the whole *shloka*. These are equally divided into 16 letters in one line. That means *sutrakaara* carefully chooses the words that fit perfectly in this structure, to code the secret treasures in the elegantly sounding *Sutras*.

Each *shloka* is made up of 4 पादs (1/4th of a *shloka* is called a पाद, and each पाद consists of 8 letters.

In order to chant and memorise a *shloka*, we can divide it into smaller units called पाद and this division is also called as सम्प्रदानम्.

The beginners may stumble to chant or to pronounce the whole *shloka* at once or may find it hard to get by-heart the whole *shloka*. For them *sampradanam* is a boon.

Let us see an example:

1st पाद	2nd पाद
आयुःकामयमानेन	धमार्थसुखसाधनम्
1 2 3 4 5 6 7 8	1 2 3 4 5 6 7 8
3rd पाद	4th पाद
आयुर्वेदोपदेशेषु	विधेयः परमादरः
1 2 3 4 5 6 7 8	1 2 3 4 5 6 7 8

Starting with 1st पाद at a time, repeating it several times, until our pronunciation becomes perfect and we can read fluently. Once we are done with this, then the 2nd पाद, then the 3rd पाद, and then 4th पाद.

Next step is to join both 1st and 2nd पादs together and to practice repeatedly till we become perfect and later to practice 3rd and 4th पादs together.

The last step is to read the entire *shloka* together and repeat till we become fluent in reading or until we पाद memorise the *sutra*. Once we are done with this, then the next *shloka* should be practiced in the same way.

If we are completely new to संस्कृतभाषा, the words may seem difficult to pronounce together at once. In that case, we can further divide the into individual and complete पदs (words) and practice chanting word by word. Each पद should be read repeatedly and then the same process is continued as told previously.

After all, *sampradanam* is to split/divide thoughtfully as per our present chanting ability.

What to do in case of गद्यसूत्र ?

If the सूत्र is in गद्य form (prose), the coding is a bit different here. We may find a lengthy set of words, which could be a hard pill for a beginner. In that instance, split the *gadyasutra* into smallest chunk for your present capacity. Identify single पद (smallest meaningful unit), split the *sandhis* if needed, and practice chanting the word repeatedly for multiple times, then two पदs should be joined together and read, and then three पदs, four पदs, and so on.. and at the end, complete sentence should be practiced.

Remember our tongue is a muscle and can be trained! So, practice! practice! practice!

What are the benefits of doing सम्प्रदानम् ?

a) All of us are familiar with the statement "आयुर्वेदोपदेशेषु विधेयः परमादरः" which means that we should have unshakable trust and respect in the preachings of शास्त्र. Then what is this आदर? How to be आदर to शास्त्र ? For this, *Hemadri* gives a beautiful answer. Giving respect or आदर can be in 3 ways or at 3 levels: a) पाठ, b) अवबोध, c) अनुष्ठान.

Among these, the first stage is पाठ, which means reading with fluency, without mistake. If one can read any सूत्र fluently without any mistake, meaningfully, that itself is a way of respecting our science.

b) "यस्य द्वादशासहस्री हृदि तिष्ठति संहिता | सोऽर्थज्ञः स विचारज्ञश्चिकित्साकुशलश्च सः ॥"

Charaka, in his last chapter of *Siddhithana* mentions the importance of memorising the *shlokas*. It says that one who has mastered all 12000 shlokas of *Charaka samhita*... will become an authority both on theoretical knowledge and practical skills for sure. He will certainly become a proficient *vaidya*, who is well equipped to serve humanity in all possible ways.

Memorising *shlokas* is the first and foundational step in becoming a *Vaidya*!

c) Our aim is to understand and apply the principles mentioned in texts, but these two can happen only after proper पाठ (Properly reading).

Hence, सम्प्रदानम् is the very first step in understanding the ocean of knowledge, our संहिता .

Remember!

Chanting sutras means connecting with the shaastra- the guiding light of wisdom!

प्रभाषणम्

What if you were told to explain everything that's good and everything that's bad for a life, using minimum words.. Would you accept the challenge..?

Well! With the (not anymore!) secret technique called '*Sutra*', this is possible.

What is '*Sutra*' then ..?

अल्पाक्षरं असंदिग्धं सारवत् विश्वतोमुखम्। अक्षोभ्यमनवध्यं च सूत्रं सूत्रविदो विदुः॥

'*Sutra*' – is an incredible linguistic technique where – “Less words speak More!”

The meaningful *padas* in the *Sutras* are thoughtfully chosen and placed/coded according to the *vyakarana* rules, so that

- It sounds rhythmic.
- Easy to remember.
- and can be decoded layer by layer to unravel the *Shastrarthas* - the incredible treasures!

In other words, '*Sutra*' is the technique where huge amounts of Knowledge/wisdom (not just information) are coded into a brief 2-4 line *Sutras*. When decoded, these *sutras* can open a world of wisdom to the readers.

Our *Brihatrayees* are full of such '*Sutras*' which contain all the essential knowledge/wisdom about lives. Afterall, these are the encyclopaedias of Life-science!

No wonder, *Charaka* mentions this with so much confidence that,

‘यदिहास्ति तदन्यत्र यन्नेहास्ति न तत्क्वचित् |’ - We can find all the essential knowledge/wisdom about the life, in this *samhita*, coded in the form of 12000 '*Sutras*'.

What is Vaidya's duty, then ?

Our duty is to learn the process of decoding the '*sutras*' to realise the true essence or wisdom of life-science.

There might be several ways of decoding the *sutra*, but one among them which is simple or rather achievable for all intellectual groups, is 'प्रभाषणम्'

What is प्रभाषणम्?

अधीतशास्त्रस्य पुनरर्थतो व्याख्यानं प्रभाषणम्।

After proper *Shaastradhyayana*, technique of reviewing the *sutra* in order to decode and realise the entire essence of the science is called प्रभाषणम्.

Why do we need प्रभाषणम् technique ?

यथाश्चन्दनभारवाही भारस्य वेत्ता न तु चन्दनस्य।

एवं हि शास्त्राणि बहून्यधीत्य चार्थेषु मूढाः खरवद्वहन्ति ॥ सु. सू.4

Mere reading or memorising the *shastra/sutras* without knowing the depth of the meaning hidden inside, is as good as a donkey carrying valuable goods like sandalwood on its back without realising the value of the sandalwood.

No matter how many sandalwoods the donkey is carrying, No matter how many books we read, how many *sutras* we by-heart, without realising its true meaning, it's of no value!

Hence, there must be an effort to understand/ realise the meanings of the *Sutras*. A *vaidya* who is going to professionally deal with the lives, can not afford to be a donkey!

How प्रभाषणम् is advantageous for Vaidyas?

- *Prabhashanam* makes us independent, self-reliant in the journey of becoming a *Vaidya*. Starting from the methodology of proper reading of *shastras*, understanding the meaning and the intention of the author, applying the science in life, which is the ultimate aim of this methodology.
- *Prabhashanam* is for all. A beginner or an intermediate, or an expert *prabhashanam* technique helps in unravelling the hidden treasures of Science, as per our present level.
- Bonus! Practising *Swaadhyaaya*(self-study) in *prabhashanam* method helps us to upgrade our levels in understanding science, eventually.

Steps of प्रभाषणम् →

1) पदविभागः 2) अन्वयः 3) अन्वयार्थः 4) भावानुवादः 5) पदकृत्यम् 6) ध्वनितार्थः

1. पदविभागः

What is पदविभागः?

पद = individual component of the *sutra* with independent meaning.

विभागः = the process of identifying, separating and analysing the *padas*.

पदविभागः is one of the steps in decoding *Sutras*, where the independent components (*padas*) of the given *Sutra* are identified, separated and analysed in a way it facilitates exploring *Dhwani* of the *sutra* (the untold intentions of the author).

What is the purpose of पदविभागः?

- Identifying independent components of *sutra* helps in understanding the link between them in the *sutra*.
- As it is one of the initial steps in decoding the *sutra*, it is helpful in making further steps easier.
- Without proper पदविभागः, there are chances of misinterpretation of the *sutra*.

How to do पदविभागः?

It involves 3 major steps:

1. Identification of individual components (*padas*) properly.
2. Separating *padas* properly with the aid of *Sandhi-sutras*.
3. Analysing and categorising each *padas* with their basic details such as सुबन्तः, तिङन्तः, अव्ययः, अन्त, लिङ्ग, विभक्तिः, वचनम्, लकारः, पुरुषः etc

How to identify पद?

a) सुबन्त means a नामपद (Noun) always tells us the name of a person, thing or a place. It also can be a number. So this will be the identifying feature. Apart from this सुबन्त पद has विभक्ति and वचन.

b) तिङन्तः - क्रियापद (Verb) The word which denotes an action is called as तिङन्तः or verb. It has one more identification. It has लकारः, पुरुषः and वचनम्.

c) अव्यय -Unlike सुबन्त or तिङन्तः अव्ययs are the words which remain unchanged in its form across all विभक्ति's & वचन.

Ex: वायुः पित्तं कफश्चेति त्रयो दोषाः समासतः । विकृताविकृता देहम् घ्नन्ति ते वर्तयन्ति च ॥

Here in this सूत्र वायुः, पित्तम्, दोषाः, देहम् all these are सुबन्तपद all of these have अन्त, विभक्ति and वचन.

घ्नन्ति & वर्तयन्ति are क्रियापद both of these have ल-कार, पुरुष and वचन.

च, इति and समासतः are अव्यय because they do not get any change according to genders etc.,

A question may arise!!! What type of पद does “त्रयो” belong to? Is it सुबन्त?

It is a number so सुबन्त but it does not fit into any विभक्ति form. There is a सुबन्त - त्रयः + दोषाः become त्रयो दोषाः.

Hence, note that if there is a सन्धि in between two words the सन्धि विभजन should be done in order to identify the पद.

विकृताविकृता - Here it looks like two words but there is a समास happened in between these two words and after समास it becomes as a one पद. So wherever there is समास it should not be split, in padavibhaga.

Rules in doing पदविभागः

	Do's	Dont's
1	Our <i>padavibhaga</i> should satisfy <i>samskruta vyakarana</i> rules. i.e., it should be according to definition of <i>pada</i> , <i>sandhisutras</i> , <i>samasastras</i> etc	Separating <i>samastapadas</i> .
2	At the same time our <i>padavibhaga</i> should lead us to actual intension of author, in the <i>sutra</i> .	Doing <i>padavibhaga</i> which is grammatically correct but doesn't contribute any meaning or misleads us away from the <i>bhaava</i> of the <i>sutra</i> .
3	Numbering each <i>padas</i> .	
4	Ensuring each <i>padas</i> have independent meaning and contributing to the collective meaning of the <i>sutra</i>	

Padavibhaga in a Nutshell.

1. Remember we find 3 types of पद in any *sutra*

a)सुबन्त b)तिङ्न्त c)अव्यय

2. If there is a सन्धि in between two पद then सन्धिविभजन should be done.

3. If there is सन्धि within a पद that should not be split.

4. समस्त पद always should be considered as one पद.

2. अर्थन्वायः

Have you ever wondered why we don't find typical structured sentences in the lyrics of the songs we sing ?

Subject + object and verb at the end, that's how we find sentences in textbooks. Whereas songs or poems need not follow this structure. It might lose its charm if it sticks to this kind of sentence structure.

In a song, a verb can be found as the very first word in the line or at any random place. But, we all understand clearly what the song is trying to communicate. Song/poem composition has its own set of rules, to achieve the target of communication, which is neither monotonous, nor fall short to convey the entire intention of the author. That's the beauty of the song/poem.

Just like how we effortlessly process the meaning/intentions of the songs as soon as we listen to it, the same way when the *sutra* is heard(*sampradanam*), the meaning/intentions are processed and understood by the reader. This internal process involves rearrangement of some words in the *sutra* according to the flow of meaning/intention, joining two or more sentences etc. And hence it is called अर्थन्वाय, which is the 3rd and prime step in decoding the *sutraarthas*.

When we become closer & closer to the language, the rearrangement (*arthanwaya* step) becomes an effortless cognitive process, happening simultaneously as we listen/chant the *sutras*.

Until we get closer to the sanskrit language, until we get closer to the *shastrarthas*, until then, for a newbie the *Arthanwaya* step may seem like an isolated & elaborated step, requiring a little more time & effort in decoding them. So, let's learn to do *arthanwaya*, step by step.

What exactly is अर्थन्वायः?

अर्थं अनुसृत्य कृतः अर्थन्वायः |

The process of *arthanwaya* involves not just rearrangement of words but a subtle yet magnificent cognitive exercise of aligning our thought flow with the thought flow or intention of the author/wisdom of *shastra*.

How to do अर्थन्वायः ?

For the ease of newbies, *arthanwaya* learning is divided into levels. Following this will help us level up our *arthanwaya* skills and eventually master it.

Level 1:

In sanskrit, the basic structure of the sentence will be like this:

वाक्यम् = कर्तृ/ कर्मपद + क्रियापद

Remember :

- *Kartrupada* will be in *prathama vibhakti*.
- *Karmapada* will be in *dwitiya vibhakti*.
- The sentence always ends with *kriyapada*.

Example: शूलं करोति वायुः ।

वाक्यम् = कर्तृ/कर्मपद + क्रियापद

अर्थन्वयवाक्यम् = वायुः शूलं करोति

Level 2:

Identify *padas* in the same *vibhakti* & same *vachana*. Remember! The *padas* in the same *vibhakti* same *vachana* can be having '*visheshana-visheshya*' relationship..

The rule of thumb for level 2 is:

Identify which could be the *visheshana* & which could be the *visheshya*.

Visheshana (the describing word/adjective) should be placed first, followed by *visheshya* (the word that gets described) .

Pro-tip: Look for the words that seem to describe quality, quantity, color, nature, characteristics/properties, size/measurements, number/counts, forms, shapes, etc. in a *sutra*, these could possibly be the *Visheshana* (adjective).

Remember! We may find many *visheshanas* for 1 *visheshya* in a *sutra*!

Example1: दुष्टं शूलं करोति वायुः ।

वाक्यम् = विशेषण + विशेष्य कर्तृ, कर्मपद + क्रियापद

अर्थन्वयवाक्यम् = दुष्टः वायुः शूलं करोति ।

Example 2: दुष्टः शूलं करोति वायुः ।

वाक्यम् = विशेषण + कर्तृ, विशेषण + कर्मपद + क्रियापद

अर्थन्वयवाक्यम् = दुष्टः वायुः तीव्रम् शूलं करोति ।

Level 3:

When you find *tritiya vibhakti pada* in a *sutra*, it could be possibly communicating any of these below.

1. It could be a *karana* (an instrument/ tool) to achieve a *kriya*.

2. It could be a *hetu* (reason) for the *kriya* to happen.

Example 1: वेगोधीरणधारणैः जायन्ते रोगाः । (हेत्वर्थ)

वाक्यम् = तृतीया वि .पद + कर्मपद + क्रियापद or कर्मपद + तृतीया वि .पद + क्रियापद

अर्थन्वयवाक्यम् = वेगोधीरणधारणैः रोगाः जायन्ते । or रोगाः वेगोधीरणधारणैः जायन्ते ।

Example 2: वैद्यः जयेत् वायुं बस्तिभिः । (करणार्थ)

वाक्यम् = कर्तृ + तृतीया वि .पद + कर्मपद + क्रियापद or कर्तृ + कर्मपद + तृतीया वि .पद + क्रियापद

अर्थन्वयवाक्यम् = वैद्यः बस्तिभिः वायुं जयेत् । or वैद्यः वायुं बस्तिभिः जयेत् ।

Level 4:

Tritiya vibhakti is not only used as *hetu* & *karana*, When you find these *padas* in the *sutra* –

विना , समम् , सह , युक्तम् , जातम् the adjoining *pada* with these *padas* will be in *tritiyavibhakti*, by default!

Hence, while doing *arthanwaya* find & place these above words after suitable *tritiya vibhakti pada* in the *sutra*.

REMEMBER:

- Along with *tritiya vibhakti pada* consider these विना , समम् , सह , युक्तम् , जातम् *padas* as 1 unit while doing *arthanwaya*! Only then, the *artha* is derived!
- The mere translations of these units in other languages may not always make sense.! Remember! These units are specific to the Sanskrit language!

Examples:

- तेन विना तृणमपि न चलति ।
- तेन सह अहं गच्छामि ।
- तया सह आगच्छ ।
- अन्नेन जातः रसः सर्वं शरीरं व्याप्नोति ।
- धात्र्या समं हरीतकीं योजयेत् ।
- दाडीमामलकैः युक्तं यूयं पिबेत् ।

Level 5:

When you find *chaturthi vibhakti pada* in a *sutra*, try to understand.

1. If something is offered to some person/thing, then the person receiving (*word in chaturthi vibhakti*) & the offered thing (*word in prathamaa/dwitiyaa*) are placed together in *arthanwaya*.

Example: गणेशाय नमः अस्तु ।

बालकाय पुस्तकं देहि / पुस्तकं बालकाय देहि ।

2. If the *chaturthi vibhakti pada* itself is communicating that a particular *kriya* is happening for some purpose /reason, then place the *chaturthi vibhakti pada* close to *kriyapada*.

Example: असात्म्यं भोजनं पीडायै भवति ।

रक्तमोक्षणं तज्जयाय युञ्ज्यात् ।

If you find the word – ‘नमः/नमस्कारः’, then, without overthinking, find the *chaturthi vibhakti pada* & place it before ‘नमः/नमस्कारः’, ..

Because, Remember the rule! ‘नमः/नमस्कारः’, are always preceded by *chaturthi vibhakti pada*!

Level 6:

When you find *panchami vibhakti pada* in a *sutra*, then mainly two possibilities :

1. *Panchami vi. Pada* is denoting *hetu (the reason)* for something to happen/something happened, then the word in *panchami vibhakti* & the thing that happened because of *panchami vi. Pada* (i.e., word in *prathamaa/dwitiyaa*) are placed together in *arthanwaya*.

Example: वेगरोधात् व्याधयः भवन्ति।

अभिघातात् रक्तं कुप्यति।

Or

2. *Panchami vi. pada* is representing any form of separation, then place the *panchami vibhakti pada* before the *karmapada* (the thing that is getting separated).

Example: वृक्षात् फलं पतति।

Pro-tip: If you find the word – रक्षः / रक्षणम् / रक्षेत् / भीः/ भीतिः/ भयः/ जातः/ जायते/ मुक्तः/ मुक्तिः/ मुच्यते/ ऋते then, without overthinking, find the *Panchami vi. Pada* & place it before रक्षः / रक्षणम् / रक्षेत् / भीः/ भीतिः/ भयः/ जातः/ जायते/ मुक्तः/ मुक्तिः/ मुच्यते/ ऋते.

Because, remember the rule!

रक्षः / रक्षणम् / रक्षेत् / भीः/ भीतिः/ भयः/ जातः/ जायते/ मुक्तः/ मुक्तिः/ मुच्यते/ ऋते are always preceded by *Panchami vi. Pada* !

We are now eligible to know 1 more special point in *sanskrita bhaasha* ..

- There is one pratyaya called as ‘तसिल्’
- When this ‘तसिल्’pratyaya is added at the end of the pada, the pada sounds/looks like this – ‘विशेषतः, समन्ततः, वाततः, पित्ततः , श्लेष्मतः, उभयतः ,..’
- Whenever there is ‘तसिल्’ pratyaya, it gives the same meaning as that of *panchami vibhakti pada*. i.e. either *hetu* or *apaadana* etc
- Hence, remember this pattern & these frequently occurring *padas* with ‘तसिल्’pratyaya and use them as *panchami vi. Pada* in *arthanwaya*: ‘विशेषतः, समन्ततः, वाततः, पित्ततः , श्लेष्मतः, उभयतः, ..’

Level 7:

When you find *Shashtii vibhakti pada* in a *sutra*,

- then it must be denoting the relation/connection with other *vi.padas*.
- Hence, try finding with which *pada* this *shashti vi.pada* suits well / establishing relation/connection.

Example:

1. अहं रामस्य दासः अस्मि | (relation with *prathama vi.pada*)
2. कृष्णस्य गृहं गच्छामि | (relation with *dwitiyaa vi.pada*)
3. रमायाः लेखन्या लेख | (relation with *tritiyaa vi.pada*)
4. वनस्य संरक्षणार्थं गच्छ | (relation with *chaturthi vi.pada*)
5. तस्य शरीरात् दुर्गन्धः आगच्छति | (relation with *panchami vi.pada*)
6. लक्ष्म्याः गृहे वस | (relation with *saptami vi.pada*)

Pro -tip:

If you find the word – ‘मध्ये’ then, without overthinking, find the *shashti vi. Pada* & place it before ‘मध्ये’..

Because, remember the rule! ‘मध्ये’ always gets preceded by *shashti vi. Pada* !

Level 8 :

When you find *Saptami vibhakti pada* in a *sutra*, then check below possibilities & place them in the right place..

1. *Saptami vi. Pada* is denoting अधिष्ठानः (the place) for something to happen/something happened, then the word in *Saptami vi.* & the word that denotes what’s happening in the place (i.e.,word in *prathamaa/dwitiyaa*) are placed together in *arthanwaya*.

Example: रात्रिजागरणात् मूर्ध्नि रुक् भवति |

दिवस्वपनात् मांसे दोषः कुप्यति |

Or

2. *Saptami vi. pada* is representing the कालः (the time factor) for something to happen/something happened, then place the *Saptami vi. pada* & the word that denotes what’s happening in the time (i.e.,word in *prathamaa/dwitiyaa*) are placed together in *arthanwaya*.

Example: निशि वातः कुप्यति |

वसन्ते श्लेष्मा कुप्यति |

3. *Saptami vi. Pada* is denoting ‘सति’ (Condition/situation) for something to happen/something happened (Hence, this is also called as ‘सति - सप्तमी’!) then the word in *Saptami vi.* & the word that denotes what’s happening in the place (i.e.,word in *prathamaa/dwitiyaa*) are placed together in *arthanwaya*.

Example: मूर्च्छायां(सति) शीततोयेन मुखं सिञ्चेत् |

अनुत्किल्बे दोषे (सति) वमनम् न शस्तम् |

उत्किल्बे दोषे (सति) वमनं शस्तम् |

Remember: You may not always find the word ‘सति’ in the *sutra*, but the *bhava* (intention) of ‘सति- सप्पमी’ can be felt/observed..!

Till now we learnt how to do *arthanwaya* by:

- Understanding *Subantas*, their *vibhakti* & *vachanas*.
- Understanding the *kaarakas*.
- Understanding the relationship between 1 *subanta* with another in the *sutra*.
- Understanding the relationship between *subantas* & *kriyapadas* in the *sutra*.
- Understanding *Subantas*, their *vibhakti* & *vachanas*.
- Understanding the *kaarakas*.
- Understanding the relationship between 1 *subanta* with another in the *sutra*.
- Understanding the relationship between *subantas* & *kriyapadas* in the *sutra*.
-

With this formula i.e.,the ‘कारकार्थ’ method, we can :

- Do *arthanwaya* even if you don’t know the complete meaning of the *pada/sutra*.
- Do *arthanwaya* part by part, bit by bit, & can feel *arthanwaya* as an achievable task!
- Can break down the big *sutra* into smaller, easily understandable portions & can successfully complete initial steps of *arthanwaya*.

NOTE: We just explored a few basic steps of *arthanwaya*, and this is not the end. Once we master these basic levels, we can further explore the advance levels which includes learning to place *avyayas* appropriately, to do *arthanwaya* when there is no *kriyapada*, etc

3. भावार्थः

What is भावार्थः ?

सत्तां (सूत्रावण) अनुसृत्य वादः भावानुवादः ।

‘Sat’/‘bhaava’ is the true intentions of the author that are coded in the *sutra* form. Anchoring this ‘Sat’/‘bhaava’ firmly and summarising the meaning of *sutra* is called *bhaavartha*.

With the background of previous steps (i.e *padavibhaga*, *arthanwaya* & *anwayartha*) the first layer of *artha*(meaning/intentions) of the *sutra* is unlocked and seeing the *sutra* in relation with the previous *sutras*, the context, the *adhyaya*, the *sthaana*, the *tantra* etc reveals us multi-dimensional picture about the *sutra*. Summarising them in appropriate words of our comfortable language is *bhavartha*.

How to do भावार्थः ?

Before doing *Bhavartha* one should know the entire process of formation of the *sutra*.

1. It is the *bhaava* of the *Granthakartru*(*Acharya*) which gets transformed into sound and then gets lots of *samskaras* to become पद(word), वाक्य(sentence), प्रकरण(context), अध्याय(Chapter), स्थान(collection of chapters) and तन्त्र(the treatise).

2. Before doing *Bhavartha*, just listen to the *sutra* and download it properly(*Sampradanam*) into your system.

3. Then understand the link between the components and register the essence of all components.

4. Understand the essence of *Sutra* in relation with previous प्रकरण(context) and also with the previous chapter.

Dont’s while doing भावार्थः

- It is the *bhaava* of *Sutra*/author to be summarised, not our own personal view about *sutra/shastra*.

- The words we choose & use to summarise should do the justice to convey the true essence of the *sutra*.
- Without checking the relation of *sutra* with the context, *adhyaaya*, *sthaana*, *tantra* etc, *bhavartha* becomes incomplete and biased.

5. पदकृत्यम्

What is पदकृत्यम् ?

A set of letters transform into a meaningful word through many samskaras. Each samskara or the step involved, contributes in giving the most appropriate meaning to that word. The process or the journey in understanding the formation of a word is called as पदकृत्यम्. In other words, padakrutyam is a step to explore how each word in the *sutra* contributes to the unique meaning of the *sutra* through their unique individual existence in the *sutra*.

How to do पदकृत्यम्?

1. First identify the pada. So also the synonyms of the particular pada and its meaning.
2. If the pada is subanta, identify its linga, vibhakti, & vachana.
3. If the pada is tingantha, identify the lakara, purusha, & vachana.
4. If the pada is avyaya, try to identify what kind of avyaya & its meaning.
5. If the subanta pada is a samastapada, do vigrahavakya, identify the type of samasa, and identify linga, vibhakti, vachana, dhatu & dhatvartha of each padas involved in the samastapada.
6. Next step will be the identification of the dhatu and dhatvartha of identified padas.
7. If there are any upasargas in the shloka, identify them and explore the meaning of the same.

8. At the end we should try to find out how each step contributes in deriving additional information about that pada and eventually how that pada contributes to the holistic meaning of the sutra.

Where can we get all this information?

1. 'Amarakosha' - a classical thesaurus of Sanskrit, that has the synonyms for most of the words.
2. 'Dhatu Ratnavali' {Bruhat-dhatu-kusumakara} helps us in identifying the Dhatu and Dhatvartha.
3. Shabda-kalpadruma helps us in finding out different contexts where the word is used.
4. They are also available at the tip of your fingers as android apps of the same name. Kindly acquaint yourself with these apps and utilise them.

What are the benefits of पदकृत्यम्?

Let's understand the benefit of पदकृत्यम् with an example.

The word 'उपक्रम' is used as a synonym for 'चिकित्सा'. Padakrutya of these two words will give us different dimensions about the so-called 'treatment'.

उपक्रमः

चिकित्सा

उप + क्रमु - पादविक्षेपे

कित् - रोगापनयने

{उपसर्ग} + {धातु} - {धात्वर्थ}

{धातु} - {धात्वर्थ}

near{immediate} step

capability of removing of disease

The word 'उपक्रम' emphasises the immediate step that has to be taken by the *Vaidya* after the diagnosis is made.

The immediate step need not be in the form of a drug/medicine. Its rather any wise action to be done by a *vaidya* in order to ease the suffering of the life(patient's) or to encourage patient's will or to inspire a life to make a wise decision. A humble encouraging pat on the back of a patient, simple words like 'you did your best' or any kind gestures etc could be the '*Upakrama*' - a lifechanging act for the patient. So even when there is no opportunity to medicines to work, a *vaidya* should still continue with the '*Upakrama*'.

Whereas, the word 'चिकित्सा' emphasizes the ability of the treatment in the removal of the disease.

The thoughtful prescription including medicines/drugs and *pathya-apathya* (*ahara, vihara*) that can efficiently combat the disease and brings back the health in the patient is '*Chikitsa*'.

These meanings elaborated in paragraphs are hidden or rather coded wisely in just two words. And, through the step called *padakrutyam*, the decoding is done.!

6. ध्वनितार्थः

What is ध्वनितार्थः?

Let us consider the word '*Rasa*'. For a cook, this will mean taste while for a dancer it will be about emotions. Similarly a sentence told in a different context means differently. Wishing "Best of luck" to your best friend and to your opponent in a game though carry the same words but the intent of the speaker is different. Unravelling the intent of the *Granthakartru* in formulating a sutra is called "*Dhvanitartha*".

What should I know to unravel this?

1. *Vyakarana*- understand the grammatical rules
2. *Tantrayukti*- to formulate the treatise, the *granthakartru* has to follow rules, by knowing these we can understand meaning between the lines.
3. *Tantra Samanvaya*- by reading the topic in other treatises gives us understanding from different perspectives.

How to do it ?

Decode the *Sutra* using all the steps of *prabhashanam*.

Study the same *Vishaya*(Topic) in different *Granthas*. Identify the similarities and uniqueness in the context.

Extract *Dhvanitartha*. *Dhvanitartha* can be extracted from various steps of the *Prabhashana-krama*.
